

CHRIS PHAM

Data Engineer

A data engineer with a knack for transforming raw data into valuable insights, I find joy in bridging the gap between complex information and practical applications. I thrive on challenges that require me to design and implement robust data pipelines, wrangle data from diverse sources, and manage efficient databases. My analytical mindset and love for problem-solving fuel my quest to build scalable and optimized solutions that empower businesses and individuals to make data-driven decisions.

Education

● Bachelor of Science

BSc, Computer Science

The University of Auckland

2019-2022

Technical Skills

Snowflake SQL

Dbt

Data Modelling

Python Programming

Problem Solving

Data Analysis

Experience

Data Engineer

Laybuy

Jul 2022 - Present

Design, develop, and maintain the technical infrastructure and processes needed to support the organisation's data needs. Work closely with cross-functional teams to identify data requirements, design and implement data pipelines, and build scalable solutions for data storage and processing.

Student Tutor

Mount Albert Grammar School

Mar 2020 - Dec 2022

- Explain high school level physics and mathematics concepts.
- Solve any inquiries.
- Help with student assignments.
- Assist with student learning method.

Software Developer

Peer Assess Pro

Feb 2022 - Jun 2022

For my capstone course, my group took on a project that aims to improve the quality of reports generated by Peer Assess Pro.

Teaching Assistant

The University of Auckland

Mar 2021 - Mar 2022

Assisting stage I Computer Science students with their practical coding assignments and labs.
